OFFICIAL DOMESTIC WARRANTY

5-Year Workmanship & Adhesion Guarantee

Certified against peeling, lifting, shrinking, and water ingress on domestic silicone installations

CERTIFICATE REF:	NLS-DOM-2026	**COVERAGE PERIOD:**	5 Full Years (From Completion Date)
CLIENT NAME:	Valued Domestic Client	**SERVICE CLASS:**	Domestic Sanitary Silicone Resealing
SEALANT SYSTEM:	ARBO Professional Sanitary Silicone	**REMEDIAL PROMISE:**	100% Free Return Visit Guarantee

GUARANTEED ADHESION & WORKMANSHIP STANDARDS

Full Mechanical Excision & Solvent Prep

All decayed silicone physically cut out down to the bare substrate, degreased with industrial residue removers, and dried before fresh tooling.

5-Year Structural Adhesion Guarantee

The silicone bead is guaranteed not to peel, curl, lift, or detach from sound acrylic, ceramic, porcelain, glass, quartz, or frames.

100% Watertight Joint Barrier

Complete protection against water penetration, safeguarding your sub-floors, joists, and ceilings from costly moisture and timber damage.

ARBO Anti-Fungal Sanitary Sealant

Tooled using ARBO professional sanitary silicone loaded with active fungicides engineered to stop mould colonisation inside the bead.

⚠️ **Critical 24-Hour Curing Period:** Do not use showers, baths, or run water over newly sealed joints for a minimum of **24 hours**. Trade silicone requires a full 24-hour window to vulcanise through to the core. Please refer to Page 2 for aftercare instructions and warranty terms.

Aftercare Guide & Guarantee Terms

Keeping your fresh silicone joints in pristine condition for years to come

Next Level Sealants Ltd
nextlevelsealants.co.uk

1. ESSENTIAL AFTERCARE GUIDELINES

1 **First 24 Hours: Keep 100% Dry**

Professional ARBO sanitary silicone requires 24 hours to fully vulcanise through to the core. Do not use the shower, run a bath, or wipe the joint during this window. Keep the bathroom door ajar or a window vented to promote air circulation.

2 **Ongoing Cleaning Routine**

Clean regularly with a mild bathroom spray and a soft microfiber cloth. While ARBO sanitary silicone contains active fungicides preventing mould growing *inside* the bead, mould spores can feed on stagnant soap residue or shampoo left on the surface. A simple rinse and wipe down prevents scum buildup.

3 **Avoid Harsh Chemicals & Scourers**

Never scrub the silicone bead with wire wool, scouring pads, or abrasive pastes. Avoid leaving concentrated caustic bleach or drain unblocker pooled against silicone joints, as harsh chemicals can degrade surface shine.

2. FAIR TERMS & SCOPE OF COVERAGE

✓ FULLY COVERED (5 YEARS)

- **Silicone Peeling or Lifting:** Sealant detaching from sound tiles, acrylic trays, baths, worktops, or frames.
- **Adhesion Loss:** Bond breakdown caused by material curing failure.
- **Direct Water Ingress:** Water penetrating through the silicone bead itself.
- **Free Remedial Replacement:** 100% free return visit to strip and replace any failed bead.

✕ FAIR USE EXCLUSIONS

- **Rigid Tile Grout:** Guarantee covers flexible silicone seals; mineral tile grout lines are excluded (durability depends on building movement & background tiles).
- **Severe Structural Movement:** Unsupported baths or trays dropping significantly under human weight.
- **Plumbing Leaks:** Leaks from internal waste traps or pipes concealed behind walls.
- **Physical Damage:** Cuts from razor blades, scrapers, or sharp objects.

3. ZERO-FUSS GUARANTEE CLAIM PROCEDURE

No claim forms. No lengthy questionnaires. No arguing.

If you suspect an issue with any silicone joint we installed, take 2 clear photos and send them via WhatsApp to

0151 453 5755

along with your address. Liam will review your photos within 24 hours and arrange a priority return visit completely free of charge.
